

Attention Students!

Save the Date: Space 101

Thursday, July 16, 2009

9:00 a.m. – 3:30 p.m.

at

Space Exploration Technologies

12301 Crenshaw Blvd., Hawthorne, CA 90250

Space, Aerospace and Government Industry Knowledge

Aerospace/Space 101 – "Rocket Science" Basics

In today's business climate, fundamental technical knowledge of the aerospace industry is key to building the right strategy, winning and supporting customers, as well as driving business stability and growth. Accurate communication and understanding of key technical requirements provides suppliers with a competitive edge and is the key to success and mission assurance as it provides basic technical understanding by multiple company functions through out the supply chain.

Industry experts will explain this and more on July 16 from 9 a.m. to 3:30 p.m. at Space Exploration Technologies (SpaceX), near LAX. The day will include a tour of SpaceX's vertically integrated launch facilities as well as lunch. This is an ideal opportunity for students and faculty to experience real-world aerospace end-to-end design, production and operations.

If you are interested in attending, please contact Teresa Henderson at (626) 440-0565 or teresa.henderson@csewi.org. Please respond by July 3.
